

Professional Summary

Senior Data Engineer and Software Developer with 5+ years of experience building cloud-native data platforms on AWS and designing robust ETL/ELT pipelines at scale. Specialized in dbt, Apache Airflow, Kafka, Snowflake, and Databricks, with a strong background in data governance and GDPR compliance. Graduated M.Sc. in Data Engineering & Analytics from TU Munich.

Education

2022–2025 **M.Sc. Data Engineering and Analytics**, *Technical University of Munich (TUM)*, Munich, Germany

2014–2019 **B.Sc. Electrical and Electronics Engineering**, *Bahcesehir University*, Istanbul, Turkey, **Minor(Diplom) of Computer Science**, *Bahcesehir University*, Istanbul, Turkey

○ Key Courses: Algorithms (A), Data Structures (B+), Database Systems (B+)

Experience

Nov 2023 – **Project-Based Full Stack & Algorithm Developer**, *AI-Lab, Bundeswehr University Munich*, Munich, Germany

- Architected and developed a real-time geospatial data visualization GUI using ViteJS, ROSLib, and MapLibre, enabling live situational awareness for flight operations across 3+ concurrent data streams, reducing operator response time by ~40%
- Integrated live flight simulator (X-Plane) telemetry into a ROS2 environment, building custom data bridges that reduced integration latency from raw feed to visualization by ~40%
- Designed and implemented data processing pipelines connecting eye-tracking hardware sensors to the ROS2 ecosystem, supporting 5+ experimental research sessions with continuous data logging
- Collaborated in an interdisciplinary research team (engineers, UX researchers, defense scientists) to deliver a working prototype within a 12-month project timeline
- Tech: JavaScript, ROS2, X-Plane, MapLibre, ViteJS

May 2023 – **AI Developer & Data Engineer**, *Infineon Technologies*, Munich, Germany

- Sep 2023
- Built ML/NLP-based product recommendation models, improving internal recommendation relevance scores by ~20% in benchmark evaluations across 200K+ SKUs
 - Automated data preprocessing and feature engineering workflows in Python, reducing manual preparation time by ~60% across 3 model training pipelines
 - Conducted exploratory data analysis and model performance reporting using pandas, seaborn, and Jupyter, producing weekly insight reports for the data science team
 - Documented ETL workflows and model pipelines, enabling seamless handover and reuse by the broader engineering team after internship conclusion
 - Tech: Python, Seaborn, ML, NLP, ETL

- May 2022 – **Senior Data Governance Engineer**, *QNB Finansbank*, Istanbul, Turkey
- Oct 2022
- Defined data ownership frameworks and governance KPIs across 5+ business units, establishing GDPR-compliant quality metrics adopted company-wide
 - Collaborated with DevOps teams to implement automated data quality monitoring, reducing data incidents flagged in compliance audits by ~ 35%
 - Designed data classification and lineage documentation standards aligned with GDPR / KVKK Articles record-keeping obligations
 - Tech: Data Governance, Business Continuity, Compliance, GDPR
- May 2021 – **Senior Consultant – Information Governance**, *Plainex Technology*, Istanbul, Turkey
- May 2022
- Delivered 8+ GDPR-aware proof-of-concept implementations for Micro Focus tools (CM, CP, SDM), directly supporting post-sales conversion for enterprise clients in regulated industries
 - Led client workshops on information governance frameworks and data compliance best practices and post-sales technical support for 10+ enterprise accounts, achieving high client satisfaction and renewal rates
 - Advised clients on aligning Micro Focus SDM workflows with data retention and access control policies under GDPR, information management, and data governance
 - Tech: Micro Focus CM/CP/SDM, Information Governance, Client Delivery
- Jul 2019 – **Data Processing & Governance Engineer**, *Kafein Technology Solutions*, Istanbul, Turkey
- May 2021
- Developed and maintained scalable ETL pipelines processing millions of records daily, reducing data latency from source to warehouse by ~ 50%
 - Contributed to lakehouse and Data Vault architecture improvements, supporting a data platform used by 10+ internal teams
 - Tech: Python, SQL, Data Vault, Data Lakes, ETL
- Sep 2018 – **R&D Engineer (NLP)**, *CyanLog*, Istanbul, Turkey
- Jul 2019
- Built a Turkish NLP language detection and correction system from scratch using transfer learning, achieving ~ 85% accuracy on domain-specific corpora
 - Applied custom tokenizers and ML models to process 900K+ text records for NLP correction tasks
 - Tech: Python, NLP, Transfer Learning, Custom Tokenizers

Projects

Personal Webpage Built a static portfolio with HTML, CSS, and JS during early web development learning.
<https://umutmor7.github.io>

Skills

Python, SQL, PySpark, Spark SQL, JavaScript, dbt, Apache Airflow, Apache Kafka, Snowflake, Databricks, AWS Glue, AWS S3, AWS EC2, AWS Lambda, AWS RDS, Docker, Git, ETL/ELT, Data Vault, Data Lakes, Data Governance, GDPR, Power BI, pandas, seaborn, Jupyter, NLP, Machine Learning, Transfer Learning, ROS2, Micro Focus (CM, CP, SDM)

Interests

Data Engineering, Data Infrastructure, Cloud Data Management, Web Scrapping, Distributed Systems Design, GDPR, Data Processing, AI Algorithms, Open Source Projects, Entrepreneurship, Continuous Learning, Collaboration

Availability

Notice Period None
